

Victoria Flores

Graduate Student

University of Texas Medical Branch Galveston

Super-Resolution Tracing of the Entire Salmonella Genom

Victoria Flores, a native of Houston, is currently a graduate student at the University of Texas Medical Branch in Galveston. She graduated from the University of Dallas with a Bachelor of Science in biochemistry, where her senior project focused on the use of inorganic nanoparticles as antimicrobials. After graduating, she participated in the PREP program at UTMB where her research looked at the role of endogenous hydrogen sulfide production in tumor angiogenesis. In Fall 2021, she joined the Nir lab where she has been working on imaging the bacterial chromosome at super resolution. In her free time, she enjoys time at the beach reading a good book.
